We searched high and low for these "gotta-have" items.

Healthy Hair

We all want strong, beautiful hair, but our hair does not always tolerate changing weather conditions and color treatments. Now there is a way to bring life back to your hair. **KEUNE's** color maintenance program gives hair volume and shine while preserving your color. The *Tinta Color Extension Lock-In* by **KEUNE** cares for color-treated hair with a color stabilizer and a natural UV filter. The *Color Extension Add-In Conditioners* help add lost pigment back into the hair. Sunflower seed extract is the key ingredient to the *Color Extension* products. The **KEUNE** color maintenance program is a must for the winter season. Your dry, damaged hair will be soft and shiny shortly after you start the program. **Available exclusively at spas and salons everywhere.**
